

GO-GLOBAL IPAD CLIENT FAQ

1. What is the GO-Global iPad Client ?

The iPad client is a native iOS client for the GO-Global product suite, used for viewing and interacting with remote applications on the iPad. Using just your fingers, you can interact with your favorite applications using the best-in-class tablet.

2. Where can I download the iPad client?

From the Apple App store. Simply search for "GO-Global". You can also use this [direct link to locate the GO-Global client on iTunes via a browser](#).

3. What does the iPad client cost?

The iPad is a *free* client.

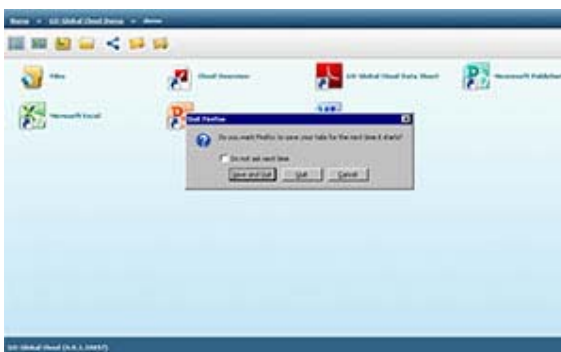

4. Is there a special license requirement for the iPad client?

No. The client follows the GO-Global server based license model.

5. What unique features does the iPad client offer?

- a. **Easy access to application on GO-Global Hosts** (Windows and Linux)
- b. **Auto-Zoom function**

When you are prompted by a dialogue window, the window will automatically zoom in for better visibility and control.
